As the European market leader, Viessmann Kältetechnik AG is today the principal manufacturer of temperature-controlled rooms for trade and industry. Clever innovations not only revolutionise the refrigeration technology market, but also offer trend-setting solutions for even the most personalised applications, thus substantiating the company's high technological standards.

With over 400 employees currently at the Hof (Upper Franconia) site, we ensure that the Hof production plant manufactures products destined for application areas that require the highest standards, such as gastronomy, the hotel industry or food production and processing. Hygiene primarily plays an essential role in this. As one of the five largest companies of its sector, Viessmann has broken the mould regarding hygiene and developed a unique antimicrobial powder coating (SilverProtec®), used for the first time as standard for all Viessmann chiller rooms, cold rooms and deep-freezing rooms, offering long-term protection from harmful micro-organisms.

winterhalter

Winterhalter is the leading manufacturer of commercial ware washing machines in Europe, a status which has been achieved by taking a focused and specialised approach since the company's formation over 60 years ago.

Winterhalter has continued to assert its role as the market leader by providing the total solution for the entire washing process, developing an equally innovative range of water treatment equipment and Ware washing chemicals alongside its range of glass, dish and utensil washers.

Winterhalter Complete Programme includes, for the first time, new generation of rack conveyor and flight - type dishwashers.

With a 125-year-old tradition AlexanderSolia - composed of the brands Alexanderwerk and Solia - offers a variety in processing machines for food products.

Smaller machines for the application in the catering trade, big machines for the community catering up to complete systems of the industrial food processing which are used in agricultural operations as well as in the food industry. In between wide uses are found for catering, canteens and commercial kitchens.
